Fabric Guidelines
and Availability

NOVEMBER 2024

VISIT WWW.PARKERKNOLL.CO.UK/FABRIC-GUIDELINES/

Parker Knoll

Our extensive range of fabrics and seat interiors have been expertly selected so our customers can personalise their sofa to meet their interior and comfort needs. With some of these options the customer may need to take extra steps to care for their sofa to keep it in pristine condition. In addition to this we have various fabric and leather guidelines dependent on the model. Please familiarise yourself with the aftercare instructions and guidelines to have the best conversations with your customers at the point of sale.

Fabric Guidelines

Matched fabrics

Matched fabrics cannot be used on the Edward, 1701 or 1801. Please refer to the individual swatch fabric.

Railroaded Fabrics

The Isabelle Sofa with a Fixed Seat is only available without a seam in Railroaded Fabrics. Please refer to the individual swatch fabric.

evolution and evolve

Fabrics from the evolution or evolve Collections are only available to stockists of these ranges. evolution models are only available in unmatched fabrics and limited leathers.

Fabric & Leather Guidelines

Leather

Leather is only available on selected models: Refer to the brochure or website for details. Evolution models can only be ordered in Como, Roma and Oxford leathers.

Pillow Back Models

Pillow Back Models are not available in leather on either the body or pillows.

Leather Characteristics

Leather is a natural product which can exhibit grain and/or colour variation, wrinkles, scars, scratches and bites, dependent on the specific leather. This is completely normal.

Easycare Fabrics

The Easycare fabric collection is extra durable and has stain resistant power. Almost all household oil and protein based stains can be removed.

Aftercare

Velvets and Chenilles

Pile fabrics, such as Velvets and Chenilles, will tend to crease and shade with use, and will show pressure marks and flattening, which can give the impression of uneven wear. This is not a fault, but a natural characteristic of the fabric construction. Pile fabrics will also shade depending on which way the pile lays and light is reflected. We advise to brush your sofa with a soft bristle brush to help minimise the effects of this.

Dust and Dirt

Fabrics tend to harbour dust, dirt, and pet hairs, especially in horizontal surfaces, this can increase fabric wear and cause dulling and fading of colours. Light, gentle brushing, with a soft brush, can help to minimize this.

Pilling

Short and loose fibres which are woven into fabric during production are present in many fabrics and can cause fabrics to pill, creating small balls of fluff, this is completely natural. We advise to brush your sofa with a soft bristle brush to help minimise the effects of this.

Fabric Treatments

We are unable to accept responsibility for fabrics that are treated in any way other than in the original manufacturing process.

Sunlight

Direct exposure to sunlight can cause fabric or leather colour to fade in a relatively short period of time, therefore it should be avoided.

Dye Transfer

Dye transfer from clothing, especially jeans, can leave colour variation marks on both fabric and leather, particularly on lighter colours.

Oils

Natural body oils, lotions, and creams, along with some medications, can affect the nature of the surface of both fabric and leather, causing colour and surface variation.

Sharp Objects

With both fabric and leather, contact from any type of sharp object should be avoided.
